Dear Colleague,

We have a three-year PhD studentship available at the Institut de Biologie Structurale in Grenoble. The project aims at reconstituting and characterizing the RNA replication machine of rabies virus.

We are seeking a highly motivated candidate with a master degree in structural biology, biochemistry, biophysics or chemistry with knowledge in protein and RNA biochemistry and purification techniques.

Further information can be found in the attached document.

Please, do not hesitate to forward this information to students or colleagues.

Interested candidates can contact either me (marc.jamin@ibs.fr) or Rob Ruigrok (rob.ruigrok@ibs.fr) or Jean-Marie Bourhis (jean-marie.bourhis@ibs.fr)

Thank you for your help

Marc jamin
